

ProLite P1704S-B1 | 17"

The ProLite P1704S fits the growing need for Protected LCD's within Education, Retail and Industrial applications. The toughened safety glass fitted behind the bezel offers 8H hardness rating capable of resisting above normal pressure or impact to the display. iiyama still adopt a high performance LCD panel offering a nimble 5msec response time for gaming, animations and video and a 1000:1 contrast ratio enhancing colour performance to a new level within this category. Inputs include the usual Analogue but also include DVI for future proofing during PC refreshing.

Megapixel describes the size of your desktop and therefore the amount of information your display can show. A lcd with a physical resolution of 9.2 mega pixels (3840 x 2400) can show 6 times more information than a display with 1.3 mega pixels (1280 x 1024). That means your desktop is about 600 percent bigger.
